

Caleo

Caleo combines direct white with changing coloured light: The apparently floating ring dips the hyperboloidic body of the luminaire in different colour moods; additionally, the shining body emits white light downward.

The use of Caleo is versatile: Possible for example is the illumination of tables or whole rooms. Day or night – impressing is the use in every situation.

The luminaire convinces by clear forms and premium surfaces of varnished aluminium. Apparently impossible - this is how a metallic surface appears translucent and glowing.

Design: Heinrich Fiedeler

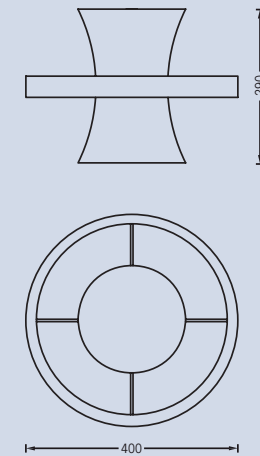

Pendant luminaire

Aluminium: silver

Lamp: 1 x CDM-R, E27, 35 W
1 x LED RGB ring, 16 W
With converter and colour changing sequencer

Lamp: 1 x CDM-R, E27, 70 W
1 x LED RGB ring, 16 W
With converter and colour changing sequencer

Lamp: 1 x PAR 30, E27, max. 100 W
1 x LED RGB ring, 16 W
With converter and colour changing sequencer
