

Profile

The Profile luminaire is characterised by the variation of direct and indirect light. The optional colours white, warm white, orange and blue can be achieved by changing the colour filter. The Profile is fitted by easily changeable TL5 lamps. It can be fixed wall-mounted or ceiling-mounted. Distances of 100, 300 or 500 mm from the wall or the ceiling are possible.

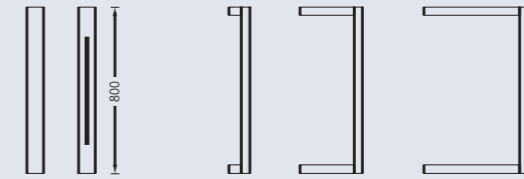

General lighting and accent lighting in public buildings as well as in private housing can be realised.

The varnished aluminium Profile can be fixed as a single luminaire or in combination. The single can have a maximum length of 3 meters. Long life cycle, stability and economic efficiency are characteristics of the Profile.

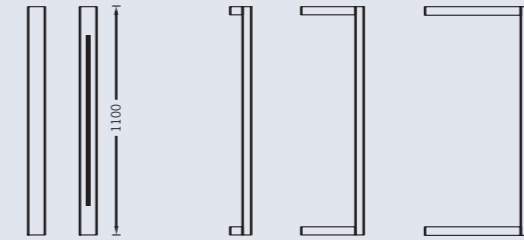

Wall-mounted or ceiling-mounted luminaire

Cast aluminium: silver
Lamp: 1 x TL5, 14 / 24 W
not dimmable
